INITIAL TREATMENT INSTRUCTIONS:
A test application should be made to fabric in an inconspicuous area before use:

1. Select a well-ventilated outdoor area protected from wind and lay out the clothing to be treated (a complete outfit is shirt, pants and socks).
2. Turn the sprayer nozzle to unlock. Hold container about 6-8 inches from surface of the clothing and spray to lightly moisten the entire surface of the fabric.
3. Continue spraying over entire outfit, until the surface of the fabric is moist enough to cause a slight color change or darkening. Pay special attention to socks, pant cuffs and shirt cuffs.
4. Turn the clothing over and treat the other side as described in Steps 2 & 3.
5. Hang the treated clothing and allow to dry for at least 2 hours (4 hours under humid conditions) before wearing.
6. Six courses will treat one complete outfit.

INITIAL TREATMENTS ON NETS, TENTS, SLEEPING BAGS AND BACKPACKS:
Do not reseal inside of sleeping bag. Spray exterior surfaces of tent only. Select a well-ventilated outdoor area protected from wind and lay out the article to be treated. Hold container about 6-8 inches from surface of the article and spray to lightly moisten the entire surface of the fabric. Continuously spray over entire article, until the (final) surface of the article is moist enough to cause a slight color change or darkening. Turn the article over and treat the other side as described above. 

RE-TREATMENT INSTRUCTIONS:
The product contains an active ingredient which actually sticks to the fabric being treated, providing residual protection which lasts for several weeks, and holds up through several washing machine washes. DO NOT RETREAT CLOTHING OR ARTICLES MORE THAN ONCE EVERY TWO WEEKS. LAUNDER CLOTHING AT LEAST ONCE BEFORE RETREATING. For re-treatment, follow instructions for initial treatment.

DIRECTIONS FOR USE:
1. Select a well-ventilated outdoor area protected from wind and lay out the clothing to be treated (a complete outfit is shirt, pants and socks).
2. Turn the sprayer nozzle to unlock. Hold container about 6-8 inches from surface of the clothing and spray to lightly moisten the entire surface of the fabric.
3. Continue spraying over entire outfit, until the surface of the fabric is moist enough to cause a slight color change or darkening. Pay special attention to socks, pant cuffs and shirt cuffs.
4. Turn the clothing over and treat the other side as described in Steps 2 & 3.
5. Hang the treated clothing and allow to dry for at least 2 hours (4 hours under humid conditions) before wearing.
6. Six courses will treat one complete outfit.

PRECAUTIONARY STATEMENTS
Hazard To Humans & Domestic Animals
Caution: Useful household product, avoid contact with skin and eyes. Avoid breathing vapor and smoke, wash thoroughly with soap and water if skin or eyes are contacted. Keep out of reach of children.

Environmental Hazards
This product is harmful to aquatic life after long periods of exposure and may harm beneficial insects or wildlife. Avoid spraying drift orrunoff from treated areas onto water bodies or onto areas where livestock or wildlife are feeding. Apply the product to areas where livestock or wildlife are not present, or to areas where livestock or wildlife are not expected to enter treated areas. Do not apply to areas where livestock or wildlife are present, or to areas where livestock or wildlife are expected to enter treated areas.

If exposed:
• Get medical attention immediately. Have the product container or label with you when calling a doctor, or going to the hospital.

If inhaled:
• Move person to fresh air.
• Call a poison control center or doctor for treatment advice.

If swallowed:
• Do not induce vomiting unless told to do so by a doctor or poison control center.
• Have the product container or label with you when calling a doctor, or going to the hospital.

FIRST AID

• Call a poison control center or doctor for treatment advice.

Pesticide Storage:
Store in a cool dry area away from children and pets.

If placed:
• Call a poison control center or doctor for treatment advice.

Storage & Disposal:
Do not contaminate water or food by storage or disposal. Apply the product to areas where livestock or wildlife are not present, or to areas where livestock or wildlife are not expected to enter treated areas. Do not apply to areas where livestock or wildlife are present, or to areas where livestock or wildlife are expected to enter treated areas. Do not apply to areas where livestock or wildlife are present, or to areas where livestock or wildlife are expected to enter treated areas.
