Other Information:
• CAPSTAR[®] is safe for use in dogs, puppies, cats and kittens 4 weeks of age and older, and 2 pounds of body weight or greater. Weigh your pet prior to administration to ensure proper dosage. It is also safe for use in pregnant or breeding dogs and cats.
• Begins working within 30 minutes. In studies, CAPSTAR[®] achieved greater than 90% effectiveness against adult fleas on dogs within 4 hours and cats within 6 hours.
• CAPSTAR[®] can be used with Intuniv[®] to provide a FLEA MANAGEMENT SYSTEM. The two products when used together kill adult fleas and prevent flea eggs from hatching.
• CAPSTAR[®] kills adult fleas that cause flea allergy dermatitis (FAD).
• If you have questions about flea control or medical problems associated with flea infestations, please consult your veterinarian.

Capstar[®] (nitenpyram)

Directions:
• A single dose of CAPSTAR[®] Tablets should kill the adult fleas on your pet. If your pet gets re-infested with fleas, you can safely give another dose as often as once per day. Please refer to the package insert for complete information.

Warnings:
Keep this and all drugs out of the reach of children.
