

Quick Caps kill fleas and are indicated for the treatment of flea infestations on dogs, cats, puppies, and kittens 2 pounds of body weight or greater, and 4 weeks of age and older.

A single dose of Quick Caps should kill the adult fleas on your pet. If your pet gets re-infested with fleas, you can safely give another dose as often as one per day.

To give Quick Caps Capsules, put the pill directly into your pets mouth, or hide it inside food or a treat. Watch closely to see if your pill was ingested, if not sure, it is safe to give your pet another one.

Treat all infested pets within your household. Fleas can re-produce on untreated pets and allow infestation to persist.
